DETAILED ACTION

1. This communication is in response to amendment filed 1/12/06.

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/6/05 has been entered.

Response to Amendment

3. Claims 5, 12, 16 have been amended. Claims 5-7, 12 and 16-18 are currently pending.

Response to Arguments

4. Applicant's arguments have been considered but are moot in view of the new ground(s) of rejections.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 5-7 and 16-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 5-7 and 16-18 are indefinite because it appears to embrace two diversified concepts of commerce as follows.

(1) a bid package is sequestered into an-house and outsource modules, the outsourced modules are then distributed to selected potential suppliers wherein the potential suppliers are selected based on statistical weight attached to each potential supplier.

(2) a bid package is sequestered into an-house and outsource modules, then the outsourced module is released for outsourced bid. In this concept, the outsourced modules are further sequestered into competitive and non-competitive modules and bids are received for the respective further sequestered modules.

These diversified concept do not seamlessly connect because the bid based process has nothing in common with the suppliers to whom the outsourced modules are distributed in the first portion of the claim (refer to steps leading to “distributing ..the outsourced module”).

The claims are also indefinite because the process steps “receiving said competitive and non-competitive bids” conflict with the process step “receiving said at least one outsourced bid” and these steps have no relationship to the step of “preparing a bid from the combining of ..”

Art Unit: 3624

The claims are also indefinite because there is no antecedent basis for limitations “said in-house bid” and “all said outsourced bids”.

The applicant is requested to carefully review the claim for other similar deficiencies and make appropriated correction.

System claims 16-18 corresponds to claims 5-7 and contain similar deficiencies.

Claim Rejections - 35 USC § 101

7. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

8. Claims 12 and 16-19 and are rejected because the claimed invention is directed to non-statutory subject matter.

Claims 12 and 16-19: the disclosed invention is inoperative and therefore lacks utility.

Claims 12 and 16-19 merely recite elements of an apparatus or a system (“means for” corresponds to software program elements and not tangible hardware components) without showing any ability to realize functionality of the recited elements (i.e. functional descriptive material per se) and therefore is rendered inoperative lacking any utility.

Note that a computer (or software program) code cannot by itself perform the underlying function until it is loaded on some computer readable memory and accessed by the computer (or a processor).

Functional descriptive material, per se, is not statutory. This is exemplified in *In re Warmerdam* 31 USPQ2d 1754 where the rejection of a claim to a disembodied data structure was affirmed. Thus a claim to a data structure, per se, or other functional descriptive material, including computer programs, per se, is not patent eligible subject matter.
